History

Current Director, Mr. Ales Jelovsek, has established his first company in the year of 1995. First products were interactive voice response IVR and voice mail system VMS. First buyers of these products were national dealers for Siemens and Alcatel Corporations. In the year of 2000 the company raised its capital and took the membership of Technology Park Ljubljana.

Mission

Our Company is developing, projecting, constructing and selling the most contemporary products and solutions for Command and Control centers. We are especially active in establishing and maintaining of Command and Control Centers, which are mostly used in Emergency Services, Civil Protection and other similar institutions. We develop our products and solutions in cooperation with complementary specialists. Our products are the result of high level of knowledge. With our solutions all your business processes can be entirely automated. We establish a genuine long-term partnership with all of our customers and suppliers.

Vision

We would like to become the leading company in the global market of information solutions for Command and Control centers. With all of the developed pallet of Products, Solutions and Services we would like to provide our customers the "One-Stop-Shop" for their business, where they can get the all-in-one solutions, designed for individually needs of an organization.
